Close This Ad The Navel (Extreme) TrialPatch 2.1 When northern Vylbrand is racked by an earthquake, Urianger Augureit suspects the kobolds of summoning the primal Titan. The Scion of the Seventh Dawn is proven irritatingly correct in short order when the Lord of Crags appears in the mountains of O'Ghomoro to flaunt powers even greater than were supposed. It does not take an augur to see that a battle to the death must soon follow. Enemies: Requirements: Restrictions: 60 minutes Sons of man! Murderers of my children! I shall grind thee beneath my heel, mortal! For thee my hatred is unending, unyielding! Titan's heart is shattered! Tremble before the might of the earth! To the last, I grapple with thee! These companies maintain growth and relevance as they continue to thrive. After having a really difficult time with Titan in Final Fantasy XIV I decided to write a guide for it. Unlike Irit, Titan has multiple additional things you have to watch for. You also need to have map awareness for this fight, if you don't you will wipe the party. Titan can be broken down into a three-phase battle, I will separate each phase below. Also, please note that this is the normal mode guide, if you are looking for Hard Mode please check my Hard Mode Guide.Phase OnePhase One is pretty simple, there are really only two moves to watch for. The first move is the most important. If you mess it up you are knocked out of the fight. Titan will jump into the air using a move called Geocrush, slamming himself down in the middle of the arena. When Titan jumps a large red circle appears, this circle is one that you want to remain inside of. If you exit the Geocrush circle you will be knocked off the map, causing instant death and the inability to rejoin the fight until everyone wipes. You will want to stand in the dark brown ring inside of the circle.The second move you want to be wary of is a straight shot move that shoots across the entire map. This attack does massive damage so don't stand in it. There is also a knock back if you stand near Titan during the attack so be wary of your surroundings when you see the red lines pop up. Phase one ends when Titan drops to 50% health, immediately going into phase two.Phase TwoPhase two will continue the attacks from phase one but will add some new mechanics. The first mechanic is you have to destroy the rocks that are dropped on party members. Party members become useless when trapped in these rocks so dispatch them as soon as possible. The other is a change in target. You need to destroy Titan's Heart instead of Titan. Titan becomes untargetable while Titan's Heart is up, but the Heart is part of Titan. Destroy the Heart to advance into the third and final phase.Phase ThreePhase three incorporates the moves from phase one and phase two, however you no longer need to worry about the Heart. So continue fighting as you did in phase two and kill Titan. When Titan dies you'll get a miniscule amount of experience, but all in all the fight is pretty fun. Patience is a key part of this fight so don't just try to push it to fast, just work Titan down at a steady pace and you'll be fine.As always, thanks for reading, if you need clarification on any point, or have a request for another guide please let me know in the comments below. Also, share this out, the more people that know the fight the less painful it will be.For more guides please check my all encompassing list of guides. All we know about Titan Extreme Mode in the upcoming 2.1 Patch!Titan Extreme Mode abilitiesDouble Granite Gaol - Granite Gaol is back, but has a few new tricks!ALWAYS targets a healer + dps.Crashes the target if not destroyed in time.Damage received is half if both gaols are in close proximity to one another.Double Granite Gaol is always followed by upheaval...Upheaval - very similar to demon walls "repel". You get pushed outwards from titan. You CAN fall if you're not careful!Due to how double granite gaol and upheaval work, there are two popular strategies dealing with this:A) Gaoled Healer under titan. Gaoled DPS at the edge - "Safer" since healers break out first, to top up the party for the upcoming stomps.B) Gaoled DPS under titan. Gaoled healer at the edge - What we use, since the dps gets released first, the second gaol dies faster.Mountain Buster - Now gives a stacking debuff which increases damage taken.Titan Extreme Post-HeartGrante Gaoler - mini-titans that give the main titan a determination up buff if too close, they also have Landslide, and an AoE pulse (like Tumult). Killing them leaves a slow field that does a massive heavy and DoT to anyone who walks there!"Asterisk" Bomb Pattern - A Strange bomb pattern with 3 sets, the "X" set, the "+" set, and the center bomb. The + Set will always spawn in N,S,E,W. (These blow up first) the X spawns at "1:30 - 4:30 - 7:30 - 10:30". (These blow up second). Then finally the center. The timing of the bomb blowing up is considerably slower than hard mode. For many of us, that delay is what caused the most difficult adjustment.5 Direction Landslide - an upgrade from the 3 direction; The tank has to dodge, too!Double Weight of the Land - exactly like weight of the land but it happens twice in succession. all non-tanks should stack behind titan, dodge outwards, then dodge inwards. Sounds horrible, but much easier than you think."Superbombs" - a bomb pattern with ZERO SAFE SPOTS. You must kill one of the (preferably) edge bombs to remain safe! A pseudo DPS check.Titan Extreme Mode Rotation [refinement]First Phase ("Irrelevant Phase") Landslide - Weight of the Land ("Plumes") - Mountain Buster - Tumult - Landslide - Geocrush at 85% (Repeat)Second Phase ("Tutorial")Landslide - Double Gaol - Upheaval - Landslide - Tumult - Plumes - Mountain Buster - Landslide - Tumult - Plumes - Mountain BusterIt is currently unclear to us how or when this pattern continues, but it should be dying much sooner than this.Heart Phase (No mountain buster!)Plumes - Double Gaol - Upheaval - Landslide - Tumult - Plumes - "Clock Bombs - Landslide. [Super combo: Plumes - Tumult - Earthen Fury]"Titans Heart should be killed at or around this time... if Titan extends past this time he does a super combo which is pretty difficult to dodge - effectively killing you with earthen fury even if your party killed the heart.Post-Heart -> DeathADDS - Mountain Buster - Asterisk Bombs - Landslide - Plumes - Double Gaol - Mountain Buster - Tumult - Double Plumes - Three Rows Bomb - Landslide - Mountain Buster - Super Bombs - Tumult - Plumes - Geocrush - (Repeat 3x)Titan Extreme Mode Loot ListTank - Tremor Earring of Fending Healer - Tremor Earring of Healing Caster - Tremor Earring of Casting Bard - Tremor Earring of Aiming Melee - Tremor Earring of Striking Follow us on Facebook for more FFXIV updates!

Everyone who is not tanking should stack up directly behind Titan. This includes the healers and ranged classes. Titan will target two players with Gaol. He preferentially targets one DPS and one Healer. When targeted by Gaol, DPS should stand directly under Titan. The healer needs to run to the far edge.
